Banish the bomber!

Finally, a green repellent gel (actually, it's white, but you know what we mean). This gel can be used for pigeons, sparrows, starlings, gulls etc. It deters birds using a combination of feel, taste and smell.

- Made from all-natural, food-grade ingredients: Geranium Oil and Malic Acid
- Polybutene-free, non-toxic
- Will not entrap birds
- Will not melt, evaporate or freeze; and will withstand wind, rain and heat
- Wipes easily from most surfaces, and cleans up easily with soap and water (it may stain dirty porous surfaces)
- Exempt from FIFRA Regulation, 40 CFR 152.25(f)

How to Use

- » Use this product on narrow ledges, pipes and beams
- » To apply, squeeze gel from tube in a zig-zag pattern
- » Re-apply gel every six months to insure effectiveness

Bird Barrier Introduces “Green”, All-Organic Repellent Bird Gel

CARSON, Calif. — A new product, Bird-Off Gel, made from geranium oil has just been introduced by Bird Barrier America to the U.S. pest management industry.

Because it lacks the polybutene of the other gels on the market it is far less sticky so it won't entrap small birds, and is a breeze to clean up; yet it stays in place and most importantly, deters birds.

“We've always shied away from the gel market because they make such a mess,” said Cameron Riddell, Bird Barrier's president. “But this is truly different. You can wipe it off your hands and tools with a rag; soap and water clean heavier applications.”

Bird-Off Gel is not exactly new; it's been marketed in Japan for several years and has a tested track record in that market; it's just new to the U.S. So PMPs can rest assured it's going to perform admirably.

Bird-Off Gel deters the birds with a combination of feel, taste and smell. They don't like the tacky sensation of the surface, and special additives in the gel deliver a smell and taste sensation that they want to avoid.

Features and Benefits

Made from all-natural, food-grade materials and does not require an EPA approval. Its active ingredient is geranium oil.

It can be wiped off your hands, surfaces and tools with a rag, and that soap and water are all you need for a serious clean-up.

It will not entrap birds, or cause them to suffocate if they try to clean it off their feathers.

It does not need to be protected with an aerosol clear-coat, saving you time and money. It works.

Like all gels, it has a lifespan to consider; you should plan to re-apply every six to 12 months.

PIGEON REPELLENT GEL

Active Ingredients

Geraniol	1%
Inert Ingredient	99%
TOTAL	100%

CAUTION : KEEP OUT OF REACH OF CHILDREN

See additional PRECAUTIONARY STATEMENTS on Back panel.
